new mentor announced for teenage engineering electronic music school (#ems): vanbot / ester ideskog.

swedish artist vanbot released an album in april 2017 called siberia, recorded entirely on the trans-siberian railway using OP-1, pocket operators and various other portable equipment.

she has previously released two albums; vanbot (2011) and perfect storm (2015) and has toured europe and the us.

the #ems program was first announced in 2016 where vanbot joined teenage engineering live on stage in the very first public pocket operator workshop, with participants from the audience.

#ems is a part of teenage engineering's initiative to nurture the love of electronic music through the use of synthesizers in every community. we offer workshops globally with the aid of our official mentors. today we announce vanbot / ester ideskog as an official mentor.

her first assignment is a workshop at the nordic culture festival in nuuk, greenland. <http://nuuknordisk.gl/en/>

teenage engineering is based in stockholm, sweden and creates high quality, well designed, electronic products for all people who love sound and music. the company was founded in 2007. teenage engineering's first product was the OP-1, a portable all-in-one synthesizer used by world famous artists. OD-11 loud speaker made to play cloud music was exclusively released at moma nyc summer 2014. in winter 2016 the pocket operator series was first introduced.
