## introducing the metal series.

say hello to the complete third generation pocket operator family, introducing new silver and copper members, all with golden features. sample anything, anywhere with the new pocket operator PO-33 K.O! sample and process your voice using the eight different voice characters of PO-35 speak. add drums with PO-32 tonic and your jam setup is complete. wherever you go. go metal.

**PO-32 tonic**  
drum synthesizer with built-in microphone and import / export functionality.

unique to PO-32 tonic is its wide range of sonic capabilities. users can even use the standard desktop version of sonic charge microtonic to shape sounds, generate patches and pattern data, and have that transferred wirelessly back to the PO-32 tonic.

**PO-33 K.O!**  
micro sampler with 40 second sample memory and built-in recording microphone.

sample any sound source using line in or the built in microphone. melodic mode lets you play chromatic melodies and drum mode lets you play drums. sequence it all and add effects on top.

**PO-35 speak**  
vocal synthesizer and sequencer with 8 different voice characters. built-in microphone for recording your own phrases.

use the built in microphone to instantly record your own voice, and completely change its character. play with it, sequence it and add effects and drums on top.

both PO-32 tonic and PO-35 speak are developed by magnus lidström of sonic charge.

teenage engineering develops highly  
acclaimed products for people who love  
sound, music and design. the company's  
first product OP-1, the portable wonder  
synthesizer, is used by world famous  
artists and was unveiled 2010. in 2014  
the OD-11 ortho directional wireless  
loudspeaker was exclusively launched at  
moma nyc. the pocket operator series  
released 2016, with currently nine units  
available, now represents the most  
affordable musical instruments available.  
teenage engineering is based in  
stockholm, sweden. the company was  
founded 2007.
