new mentor announced for teenage engineering electronic music school.

richard garrell, a beatmaker, record collector and dj from belo horizonte, brazil, has just been added as an official ems mentor for teenage engineering.

richard makes dusty live beats under the monikers eremita and aeoner, using portable synthesizers, samplers, analog machines and lofi electronic devices.

on a monthly basis he hosts the local 'synth club' together with fellow producers. synth club is a social platform promoting open meetings and collective music making, with the use of synthesizers such as OP-1 and pocket operators.

he also hosts 'beat battles' on a regular basis, as well as different workshops and events.

the next 'synth club' will take place on august 18 and future events will be listed on the teenage engineering ems page.

teenage engineering is based in stockholm, sweden and creates high quality, well designed, electronic products for all people who love sound and music. the company was founded in 2007. teenage engineering's first product was the OP-1, a portable all-in-one synthesizer used by world famous artists. OD-11 loud speaker made to play cloud music was exclusively released at moma nyc summer 2014. in winter 2016 the pocket operator series was first introduced.
