turn your OP-Z into a live performance dream machine with line module.

rediscover OP-Z! line module is designed to bring audio signals into and out of the OP-Z. use external audio signals in your mix, send the audio from selected tracks out, switch easily between mono and stereo signals, and even make fx loops with your favorite effect pedals.

audio line in/out

now you can easily connect anything with an audio output to your OP-Z: effect pedals, radio, synths, computer or even your phone. with audio out, you can separate and process individual tracks by routing them to the module output. the line module stereo output can even be used as two mono outputs.

sync in/out

tempo sync other compatible gear to OP-Z so you're on the beat, all the time

midi in/out

line module allows you to use OP-Z to control other synths with midi input, by using the OP-Z sequencer with your external equipment. with midi in, you can use an external midi controller, keyboard or computer to control your OP-Z.

trig in/out

tempo sync and trigger sounds on modular synths, like the pocket operator modular or other modular synths, by using trig out. trig in allows any track on OP-Z to be triggered by an external signal, such as a drum machine, to single step and advance the sequence.

po out

tempo sync your pocket operators and other compatible gear. have them follow the tempo of the OP-Z.

about teenage engineering

teenage engineering is developing the alternative future of consumer electronics - each invention driven by need, and built to last.

from reimagining music making with the iconic OP-1 portable synthesizer and growing the synth population with the affordable pocket operator series, to rethinking listening with the OD-11 ortho directional speaker and the OB-4 magic radio, they have applied their signature mindset to a new legacy of enduring technologies.

their creations have attracted collaborations with well known artists and brands, sharing in their vision to integrate creativity into the everyday. teenage engineering was founded in 2007 and is based in stockholm, sweden.
