## the beauty of evolution. OP-1 field is here.

introducing the all new OP-1 field. the natural continuation of its predecessor, infused with more than a decade of ideas, refinements and improvements.

updated design with the latest technology, and finely tuned with professional musicians, recording artists and sound designers in mind. higher quality in all aspects, from its circuitry to connectivity and flexibility, it's tailor made for professionals in the field.

### 100 new features

encased in natural anodized aluminium, OP-1 field boasts a new form factor with floating keyboard, new color palette, sleek high resolution screen with flush glass cover, stereo throughout the whole signal chain, bluetooth midi, 24 hr battery life, multiple tapes, styles and recording formats, a new lush sounding reverb and 'dimension' synth engine, and a new speaker system with a passive driver for detailed, bold and loud sound. we also worked in an fm antenna for transmitting and receiving and meticulously reworked all graphics, screen by screen.

connectivity has been upgraded with usb-c, 4-pole audio jack for headset mic support, and line in and out sockets are more durable. accessories as with all products in the new field series, there are a range of accessories for OP-1 field. a custom designed field bag and leather wrap are available, as well as a new range of field cables, iron- on patches and pins.

### highlights

- new floating keyboard
- dual velcro back fasteners
- 32-bit audio
- fm antenna for receiving and transmitting
- MFi for iPhone usb midi and audio connectivity
- eight tapes to record to
- new speaker with passive radiator

### dimensions

28.8 cm x 10.2 cm x 2.9 cm

### about teenage engineering

teenage engineering is developing the alternative future of consumer electronics - each invention driven by need, and built to last.

from reimagining music making with the iconic OP-1 portable synthesizer and growing the synth population with the affordable pocket operator series, to rethinking listening with the OD-11 ortho directional speaker and the OB-4 magic radio, they have applied their signature mindset to a new legacy of enduring technologies.

their creations have attracted collaborations with well known artists and brands, sharing in their vision to integrate creativity into the everyday. teenage engineering was founded in 2007 and is based in stockholm, sweden.
