the beauty of evolution. OP-1 field is here.

introducing the all new OP-1 field. the natural continuation of its predecessor, injected with more than a decade of ideas, refinements and improvements.

updated design with the latest technology, and finely tuned with professional musicians, recording artists and sound designers in mind. higher quality in all aspects, from its circuitry to connectivity and flexibility, it's tailor made for professionals in the field.

100 new features

encased in natural anodized aluminium, OP-1 field has a new low profile frame with floating keyboard, new field color palette, a high resolution screen with flush glass cover, stereo throughout the whole signal chain, bluetooth midi, 24 hr battery life, multiple tapes, styles and recording formats, a new great sounding reverb and the 'dimension' synth engine. a new speaker system with a passive driver for detailed, fat and loud sound. we also added a new fm antenna now with receiving *and* transmitting.

all graphics have meticulously been reworked screen by screen.

new upgraded connectivity with usb-c, 4-pole audio jack for headset mic support, and line in and out sockets are more durable.

highlights

- lowered frame with new floating keyboard
- dual velcro back fasteners
- 32-bit audio
- fm antenna for receiving and transmitting
- MFi for iPhone usb midi and audio connectivity
- eight tapes to record to
- new speaker with passive radiator

dimensions

28.8 cm x 10.2 cm x 2.9 cm

about teenage engineering
teenage engineering is developing the alternative future of consumer electronics - each invention driven by need, and built to last.

from reimagining music making with the iconic OP-1 portable synthesizer and growing the synth population with the affordable pocket operator series, to rethinking listening with the OD-11 ortho directional speaker and the OB-4 magic radio, they have applied their signature mindset to a new legacy of enduring technologies.

their creations have attracted collaborations with well known artists and brands, sharing in their vision to integrate creativity into the everyday. teenage engineering was founded in 2007 and is based in stockholm, sweden.
